SUMMARY

Fourth-year B.Tech CSE student (CGPA 9.73) researching agentic AI systems, including modified RAG pipelines and evaluation benchmarks, with additional experience across ML model development, full-stack platforms, and Android applications. Passionate about solving real engineering problems and delivering production-ready AI solutions in agile, collaborative team environments.

EDUCATION

B.Tech, Computer Science & Engineering — KIIT University

2023 – Present

- **CGPA: 9.73 / 10** • Merit Scholarship (Perfect 10.0, Sem 1) • GDG Chapter Lead & On-Campus Organiser

Modern High School for Girls — ICSE & ISC

Kolkata

- ICSE (Class X): **96.6%** • ISC (Class XII): **95%**

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, SQL, Kotlin

ML & AI: PyTorch, Keras, Pandas, NumPy, OpenCV, Scikit-learn, XGBoost, LLMs, Transformers, NLP, Computer Vision, Forecasting

Web & Frameworks: Next.js, React, Tailwind CSS, HTML, REST APIs

Backend & Databases: Firebase (Realtime DB / Firestore), SQL, NoSQL, API Integration

Cloud & Tools: AWS (EC2, S3), Azure (Basics), Git, Tableau, Power BI, Agile/Scrum

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

Spoken Languages: English, Bengali, Hindi, German (*learning*)

WORK EXPERIENCE

Indian Statistical Institute Pune | *Research Intern*

Jun 2026 – Present

- Conducting independent research under Dr. Subrata Rath, HOD SQC and OR Unit, applying Statistical Process Control (SPC) methods — control charts, CUSUM/EWMA drift detection, and Cp/Cpk capability analysis — to evaluate continuous reliability of LLMs in industrial decision-support tasks.
- Benchmarking multiple LLMs on real, anonymized manufacturing quality-control tasks, with outputs evaluated by domain-expert quality engineers for rigor.
- Designing a novel composite LLM reliability metric, working toward a peer-reviewed publication bridging Six Sigma quality engineering and AI evaluation.

RespAI Research Lab | *Research Assistant*

Mar 2026 – Present

- Research under Dr. Murari Mandal, Assistant Professor at my university, in the RespAI Research Lab led by him.
- Research focused on Agentic AI, designing modified Retrieval-Augmented Generation (RAG) pipelines and developing evaluation benchmarks to assess system performance

Nexaei Corp Pvt. Ltd. | *AI Model Development Intern* [cert]

Mar 2026 – Jun 2026

- Developing an AI model for direct integration into a production web application with full backend configuration.
- Designing the model-backend interface layer to enable real-time inference via REST API endpoints.
- Proactively adopting new ML frameworks and engineering methods to meet production reliability and performance standards.

Associated Initiative for Mankind Foundation | *Web Development Intern* [cert]

Aug 2025 – Present

- Architected a **full-stack platform** (Next.js + Firebase) serving **1000+** user records for a live NGO.
- Added pages for mental health and learning for underprivileged children (SoulCircle and VidyaShakti) in aimin-dia.org.in
- Built reusable UI component library reducing redundant code by **45%** and integrated NGO donation pages.

PremiumData360 (pd360) | *AI/ML Intern* [cert]

Dec 2025 – Dec 2025

- Applied Microsoft Document Intelligence to analyse and process real-life business documents at scale.

- Developed an AI model for document template classification trained on PremiumData360's proprietary dataset.
- Worked on **Microsoft Azure** and gained hands-on experience.

PricewaterhouseCoopers India | *Advisory Division Intern* [cert]

May 2025 – Jul 2025

- Improved Tableau Dashboards for a client using **SQL** and **Python**.
- Optimised Tableau dashboards and data models, improving dashboard refresh efficiency by **10%**.
- Synthesised datasets to generate insights and drive continuous reporting improvements across advisory workflows.

Sunware Technologies | *Machine Learning Intern* [cert]

Apr 2025 – May 2025

- Built end-to-end ML pipelines and improved prediction accuracy via feature engineering.
- Deployed model prototypes as **Python REST APIs**, enabling real-time inference in production.
- Worked with **Time-series data** and **LSTMs**.

Vesuvius India Limited | *MES System Intern* [cert]

Jun 2024 – Jun 2024

- Mapped end-to-end MES process flows at Vesuvius's Kolkata factory, identifying workflow bottlenecks.
- Compiled process documentation reducing manual intervention steps and was rated excellent by HR Director.

IIT Kharagpur – System & Information Lab | *Research Intern* [cert]

May 2024 – Jun 2024

- Gained hands-on experience with hardware interfacing, specifically in **Python**, **embedded C**, **IMU**, and **GPS sensors**.
- Worked with Kalman Filters and applied CSE knowledge in a different field.

PROJECTS

ShareBite – Food Redistribution Android App — *Kotlin · Firebase Realtime DB* [GitHub] Jan 2026 – Present

- Team-built Android app connecting event donors with nearby NGOs to coordinate surplus food redistribution in real time.
- Implemented live donor-NGO notification and geo-matching flow using Firebase Realtime DB and Firestore.
- Designed low-friction NGO onboarding to minimise coordination gap between food availability and distribution.
- Followed agile development practices with structured task breakdown, peer code review, and iterative delivery.

Ecosystem Stability Predictor — *XGBoost · Scikit-learn · Streamlit · Python* [GitHub] Jan 2026 – April 2026

- Built ML model (XGBoost) to predict and monitor ecological stability across aquatic and terrestrial ecosystems.
- Developed working frontend to visualise predictions and make data actionable for non-technical users.
- Aligned with **UN SDGs** 13 (Climate Action), 14 (Life Below Water), and 15 (Life on Land). Ongoing college mini-project.

SoulCircle – AI Mental Wellness Copilot — *LLM · Next.js · Supabase* [GitHub]

Oct 2025 – Present

- Engineered LLM-powered conversational platform to provide mental health help for those without professional support.
- Designed to be context-aware across sessions and optimised for low-bandwidth access.
- Live on AIM Foundation's platform which is visited by **1000+** users.

VidyaShakti – AI Learning Assistant — *NLP · Multilingual · Next.js* [GitHub]

Aug 2025 – Sep 2025

- Built multilingual AI learning assistant handling **100+** interactions, providing support for under-privileged children with rural network access
- Contains study materials for students of classes III-XII with in-built quizzes.
- Integrated into AIM Foundation's central platform for unified live deployment.

CAMPUS INVOLVEMENT

Google Developer Groups (GDG) – KIIT | *Chapter Lead & On-Campus Organiser*

Aug 2025 – Present

- Organised events with **500+** attendees including *Breaking an LLM* — the chapter's largest event to date.
- Ran introductory LLM sessions for first and second year students to build foundational AI literacy on campus.
- Serve as facilitator for **Google Cloud Study Jams**, guiding students through hands-on cloud learning tracks.

- Served on the organising committee for ICDCIT 2026, hosted by the School of Computer Engineering, KIIT University.
- Attended the conference keynote on *Distributed Intelligence on Dynamic Graphics: Partitioning, Mining and Learning at Scale*.

ACHIEVEMENTS

- **Top 5**, IIT Kharagpur Young Innovators Project (YIP) — competitive national research challenge.
- **Merit Scholarship**, KIIT University — awarded for perfect 10.0 CGPA in Semester 1.
- Conducted digital literacy workshops reaching **150+** students across underserved communities.
